

Quality X1NiCrMoCuN25-20-7
Number 1.4529

Austenitic
Stainless Steel (Superaustenitic)

Technical card rev. 2018
Lucefin Group

Chemical composition

Pitting Resistance Equivalen (Hebsleb 1982. Truman 1987)

Super-austenitic steels, ferritic and duplex have good resistance to pitting when PRE is between 40 and 60

Formulae : Cr% + (3,3 x Mo%) + (30 x N%)

Steel 1.4529 Cr% = 20 - Mo% = 6,5 - N% = 0,20 PRE = 47
